

This book gives an overview of the most important issues in the fields of English phraseology and word-formation. The textbook is composed of five main chapters, bringing together both traditional (if not compulsory) topics as well as more recent theories. The topics include the following: Phraseology as a field of language study; Collocations as partner-like multi-word items; Morpheme as a gateway to word-formation; English word-formation processes and last but far from least, Productivity as a quandary in word-formation.
